

Club Field Diagram

(To be completed each year for each field)

Use this page to include a diagram of your club field. Diagram must show: runway, fences, roadways (proximity), distances, airport proximity, buildings, etc., as well as a directional symbol to show due north. Show GPS location on drawing of each field. If you are an R/C club, you should indicate the direction and distance to any other known R/C fields within a 2.5 mile (4 km) radius. A frequency sharing agreement may be required between clubs within 4 km of each other.
