All

Please see the following studies of the provided additional sites:

- Petersen's Turf Farm – surveyed at the following coordinates

- 45°11'56.1"N 75°34'59.4"W
- 45.198922, -75.583163

Based on flying activities remaining within 1nm of those coordinates, the following can be considered accurate:

- a. Site is wholly in Class G uncontrolled airspace – nearest controlled airspace laterally is the CYOW Class C control zone – 1.3nm North.
- b. Nearest controlled airspace vertically is at 1500' above sea level (approximately 1200' above ground level).
- c. Site is not located within or near any restricted or special use airspace
- d. Nearest aerodrome or waterdrome is Manotick Hope Field located 5.3nm west. No special procedures required.

- Greenway Turf Inc (essentially the same as the previous site titled "Glider Guiders" conducted May 15) surveyed at the following coordinates:

- 45°05'22.6"N 75°35'56.1"W
- 45.089606, -75.598919

Based on flying activities remaining within 1nm of those coordinates, the following can be considered accurate:

- a. Site is wholly in Class G uncontrolled airspace up to 2500' above sea level (approximately 2200' above ground level)
- b. Site is located within CYA528 (S)(T). S=Soaring by full scale gliders and T=Training aircraft. No permission is required for MAAC to fly in a CYA, however it may be desirable to contact the users and have a discussion about Model aircraft activity, especially if we are flying large gliders and/or at higher altitudes.
- c. Nearest aerodrome is Rideau Valley Airpark @ 1.6nm northwest. Per the Exemption a procedure to ensure safety is required
 - Contact information for Aerodrome operator, should you desire to contact them (not mandatory) Chris Williams 613-296-3391

Any discrepancies or clarifications please let me know.
