

Altitude Limit Waiver

This document is to certify MAAC has **approved** a request for RPAS operation above 700' Above Ground Level at:

Name: Osoyoos Model Aviation Club - Osoyoos Airport CBB9

MAAC/Club ID # 903

Zone: C

Flying site location: 49° 02' 14.0"N, 119° 29' 27"W

Mandatory Conditions:

In addition to following all MAAC, Club and local rules:

All RPAS **must remain below 1300' Above Ground Level** and within a 0.5 nm radius from the above flying site location coordinates.

Recommendations:

No flying be permitted above 700' AGL unless a dedicated person has been assigned the sole responsibility of observing the surrounding airspace and advising of any approaching full-scale aircraft.

Use of an aviation VHF radio to monitor local frequencies for full scale traffic is encouraged anytime RPAS are operating.

Continue to arrange for a NOTAM to be issued anytime there is RPAS operation on site.

Continue to maintain the entry in the CFS.

Allowed time and dates: Operation as per agreement with the town.

Expiry date of authorization:

President, MAAC

Date: June 2 2022
