This site allows the following categories of model making:

mSATP/RPAS, Free Flight,.

For members who operate mRPAS/RPAS on this site:

If required, a textual description or diagram of the flight/model/exhibit/meeting area. The available space should be defined to the extent possible by the establishment of a flight line or operations area, a cockpit line, a well area and a spectator area. For static exhibits, exchange meetings, or exhibitions in a shopping mall, provide a description of the overall configuration. 150 gram aircraft including battery only

1. Airplane, multi-rotor, helicopter are allowed
2. Power supply only is allowed on site

3. All pre-flight inspections or assemblies must be performed in the designated area.
4. Batteries should not be connected to electric models unless the model is held in the starting area or the propulsion system is deactivated/disarmed or otherwise inoperative – no exceptions.
5. The models' direction of flight, landing and take-off, and traffic configuration are counterclockwise except when tuned and informed aloud.
6. Hand-launching must be done in agreement with all pilots flying – normally on either side of the cockpit.
7. The recovery of ATP that lands or crashes in the flight area will be done in agreement with all other modelers/pilots flying. Do not fly or operate a model directly above or near other people retrieving a model.
8. All requirements determined by /club/event/venue operator.
9. MAAC "observers" are optional on our site. Here are the site's procedures to protect people in the vicinity:
 - a. No one who is not wearing safety glasses should stay out of the gym.
 - b. When a member or other person spots a spectator who may be entering the model building area in an unsafe manner, they should shout "SPECTATOR" in a loud voice.
 - c. ALL modelers must immediately cease modeling activities in this area and, if possible, land/return to the well area as soon as safely possible.
 - d. When the safety of the bystander is no longer a threat, the person who gave the warning must shout "ALL IS CLEAR", or the modellers/pilots can make this decision themselves, and resume operations/flying.

Emergency or Safety Procedures

1. If there is any type of near miss or safety issue between a model and a bystander, ALL model building activity MUST cease immediately. Affected members must complete a MAAC Reportable Event Report and submit it to

MAAC and the club/site/event organizer and follow MAAC policy with the following exceptions:

- a. If the affected member(s) believe that the risk was very minimal, they can complete their own self-declaration or risk assessment using the MAAC form and resume modelling.
 - b. If the member or the club/venue/event organizer deems the event to be serious, model making operations will not resume until the members receive permission from the club/site/event organizer - in writing.
 - c. If there is actual contact between a model and a viewer, all modeling operations will cease until MAAC confirms that we can resume operations.
 - d. This process is for your protection.
2. A textual description of any emergency procedures on the site.
 - a. Emergency procedures such as phone numbers, exit locations, location of emergency equipment (defibrillator, fire extinguishers, etc.), and other emergency services, if applicable.
 3. No other risk mitigation strategies are required on the school gymnasium site.
 4. The club will review these rules at least once a year.
